Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer:

Milestone 1 : Flow:

Standard Laptop Task Flow:

Purpose:

The Standard laptop task automates the creation of a **Catalog Task** for Request item requests. Once the request reaches the configured Approved, the flow automatically creates a task under the related **Requested Item** and assigns it to the Assignment group field and value as " Hardware " for further processing.

Objective:

The purpose of this flow is to:

- Reduce manual task creation.
- Improve request processing speed.
- Ensure approved requests are automatically routed to the appropriate team.
- Standardize task creation and assignment.

Flow Trigger:

The flow is triggered when:

- **Request Type:** [Request/Catalog Item]
- **Trigger Condition:** Service Catalog

Approval Condition:

The flow proceeds when:

- **Approval Status:** Approved
- **Additional Conditions:** [If Applicable]

Flow Actions:

Once the approval condition is met, the flow:

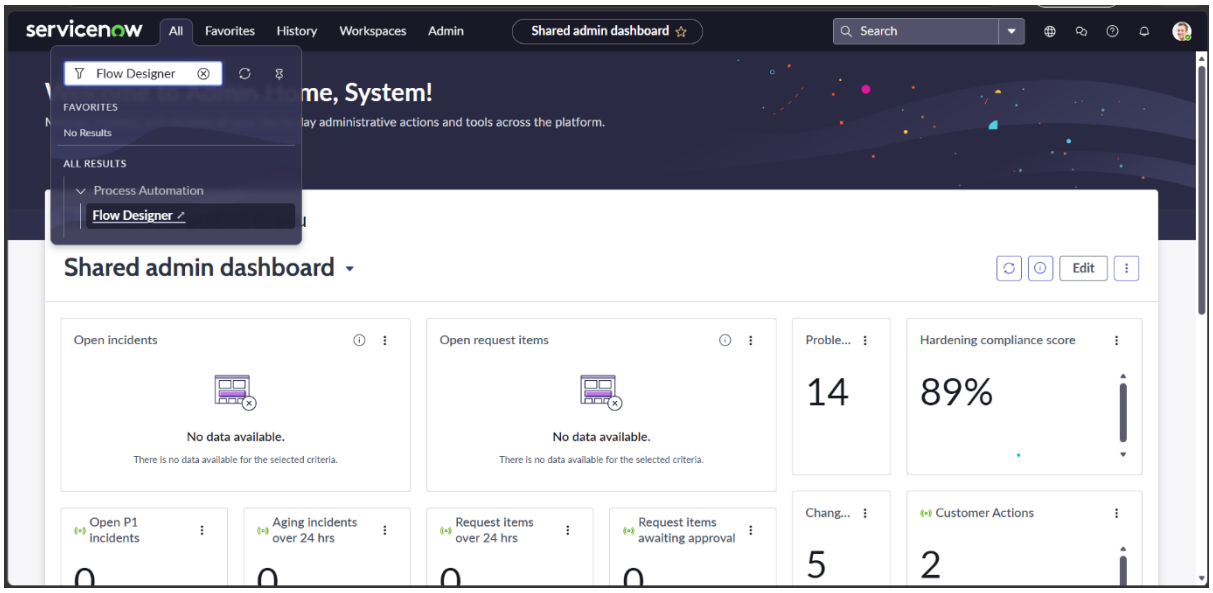

1. Identifies the related **Requested Item**.
2. Creates a **Catalog Task** under the Requested Item.
3. Populates the required task details.
4. Assigns the task to the **Hardware**.
5. Routes the task to the appropriate team for processing.

Task Details:

Field	Value
Task Type	Catalog Task
Requested Item	[Related Requested Item]
Assignment Group	Hardware
Short Description	Laptop need to Configured
Trigger	Service Catalog

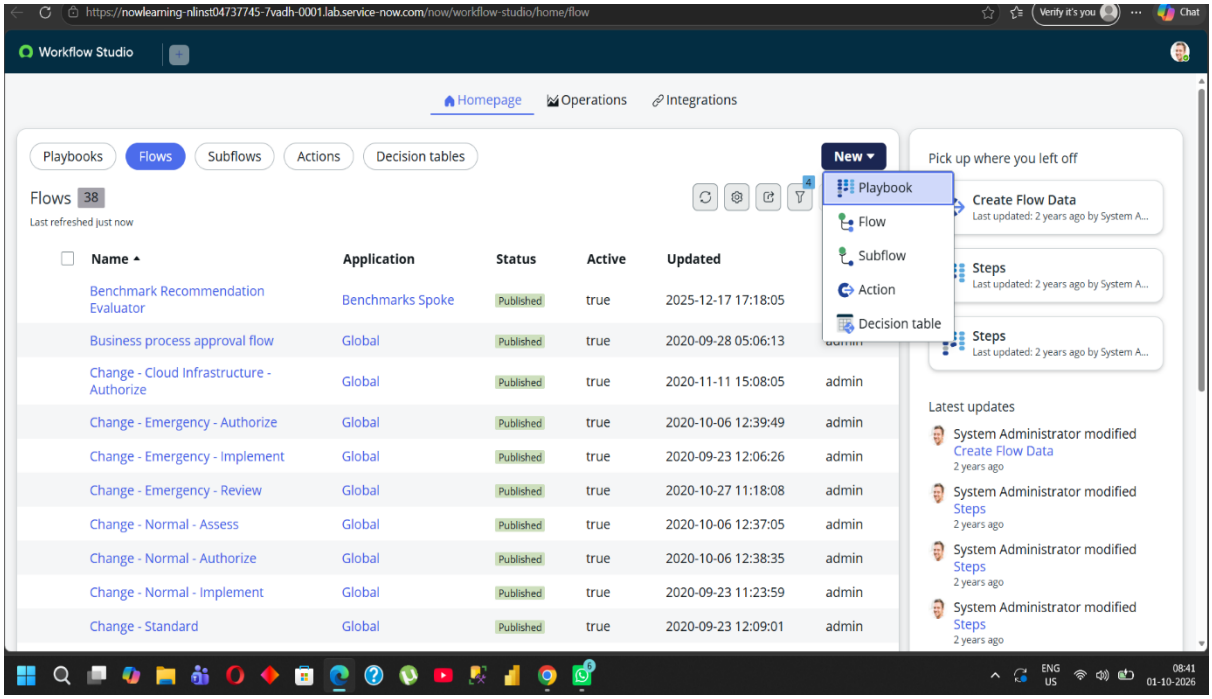

Instructions:

Step1: Open service now. Click on All - Search for Flow Designer

Step 2: Click on Flow Designer under Process Automation.

Step3: After opening Flow Designer Click on new and select Flow.

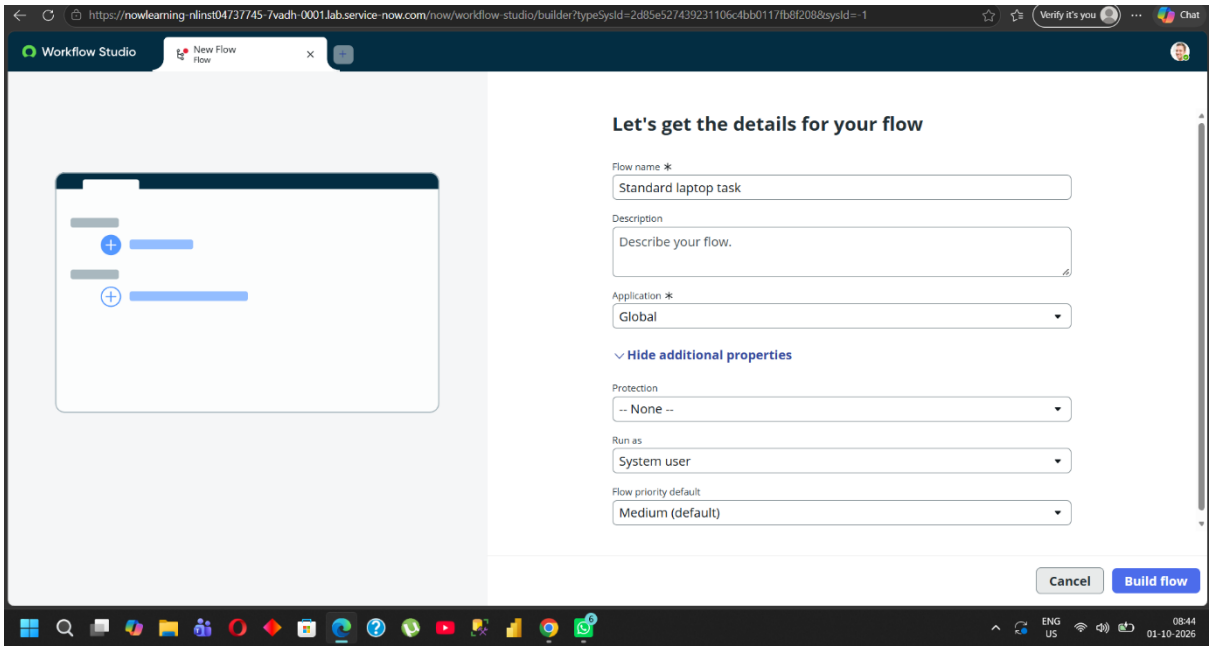

Step 4: Under Flow properties Give Flow Name as " Standard laptop task".

Step 5: Application should be Global.

Step 6: Select Run user as " System User " from that choice.

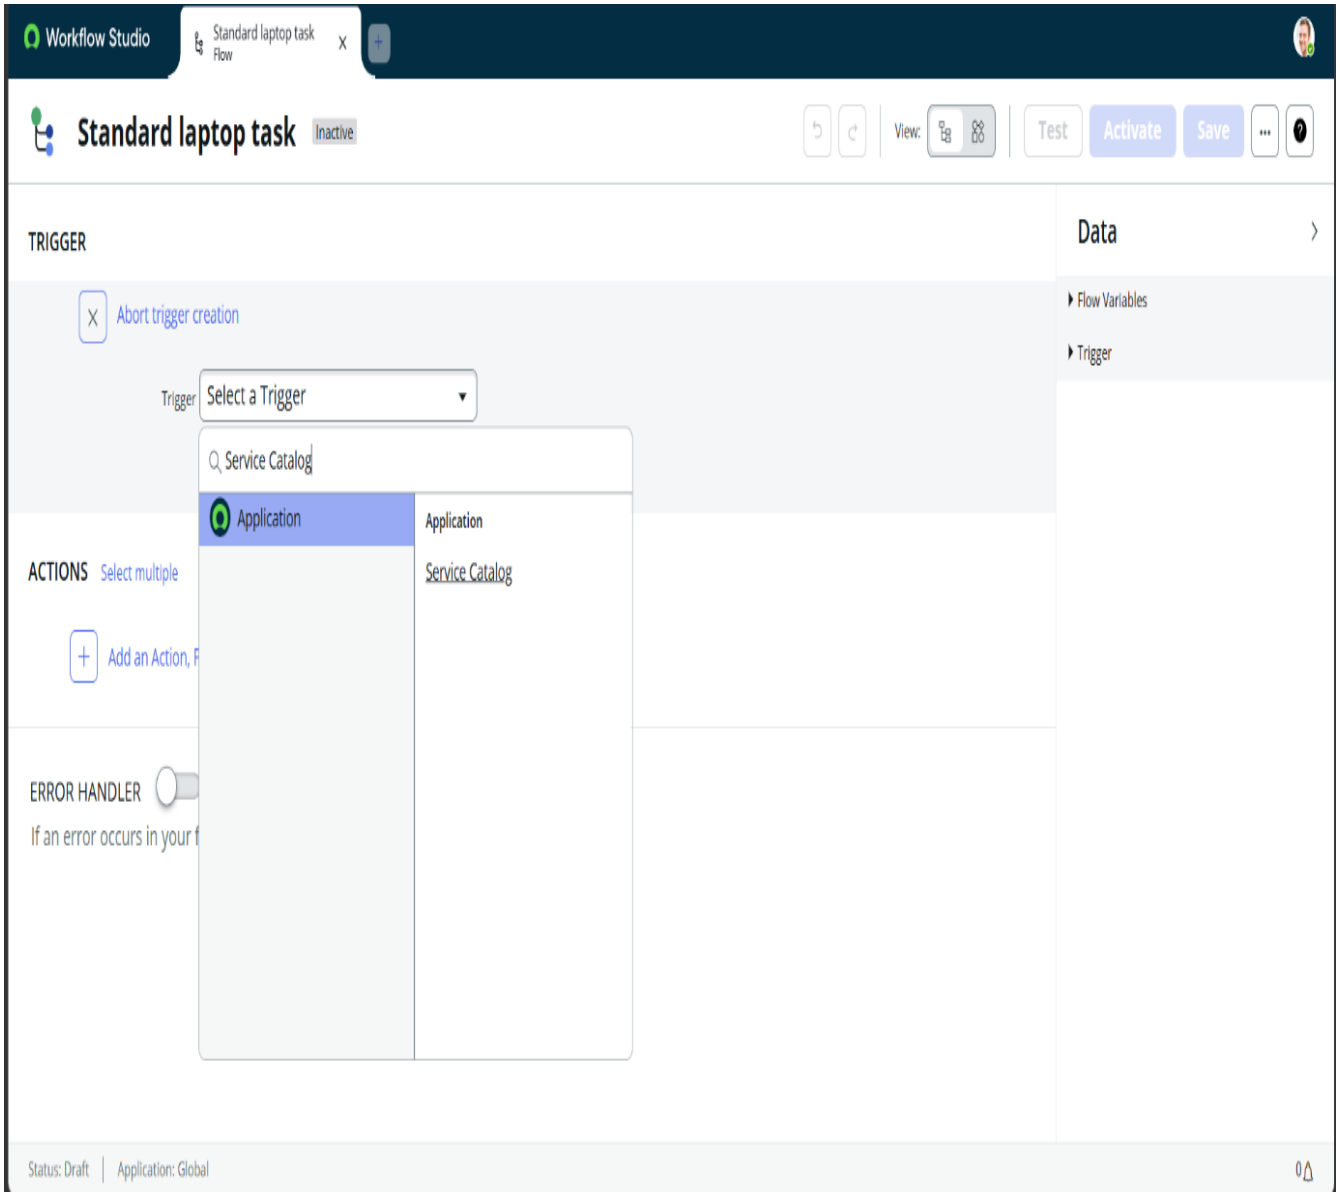

Step 7 : Click on Submit.

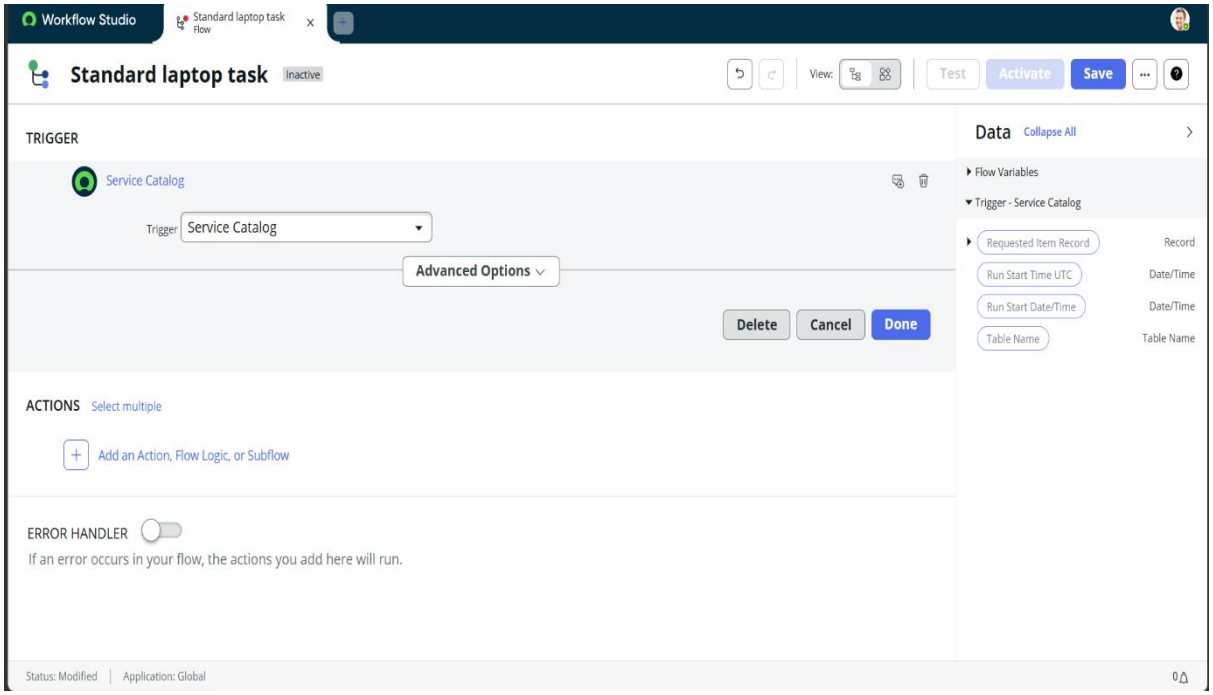

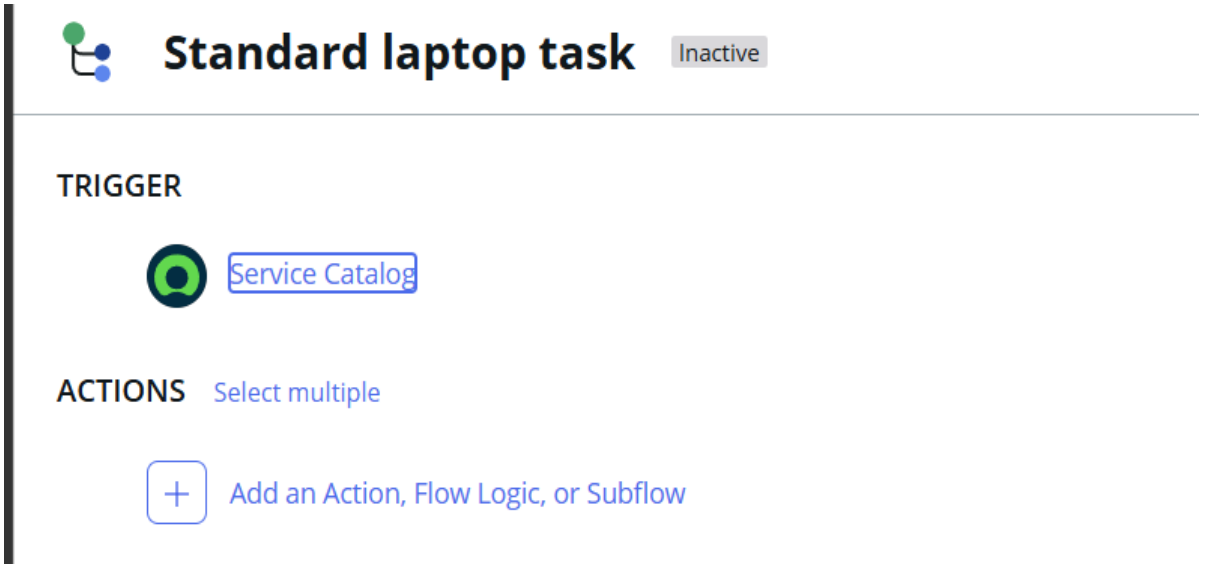

Step 8 : Click on Add a trigger

Step 9: Select the trigger in that Search for " Service Catalog " and select that.

Step 10: After that click on Done.

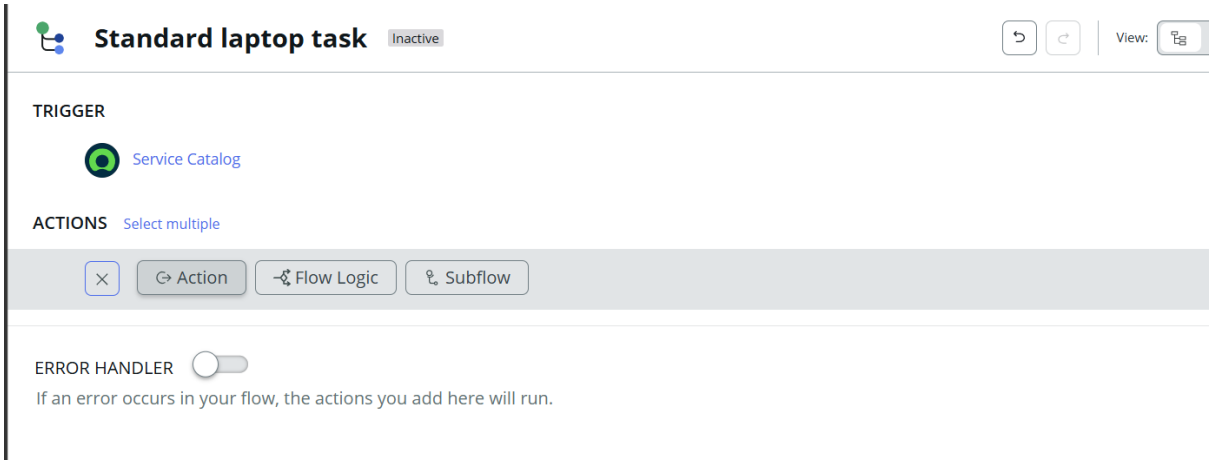

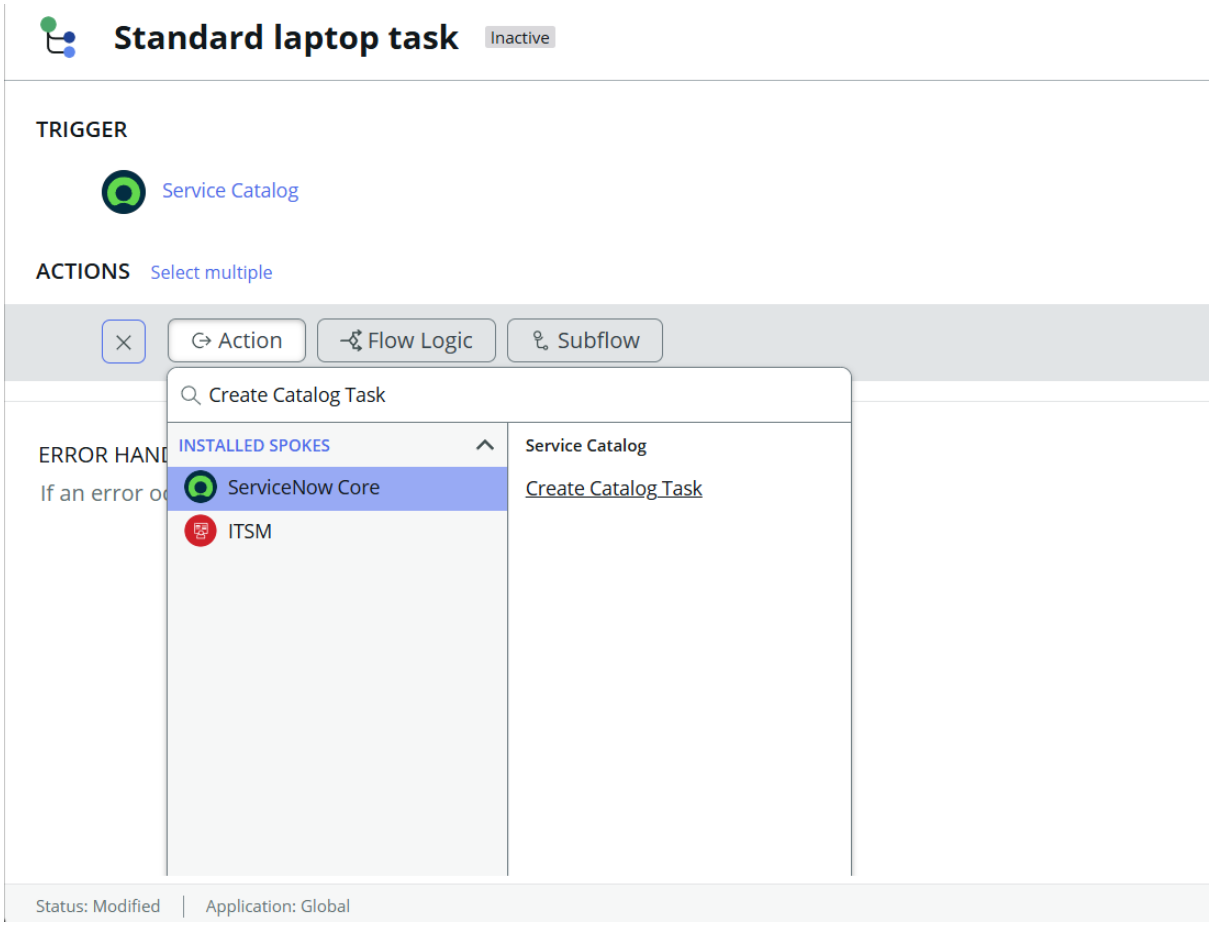

Step 11 : Now under Actions. Click on Add an action.

Step 12 : Select action in that search for " Create Catalog Task " and select that.

Step 13 : Mention these in that action

Step 14 : Action as Create Catalog Task

Step 15: Drag and drop the Requested Item Record in the Request item. Table will be auto populated as a Catalog Task.

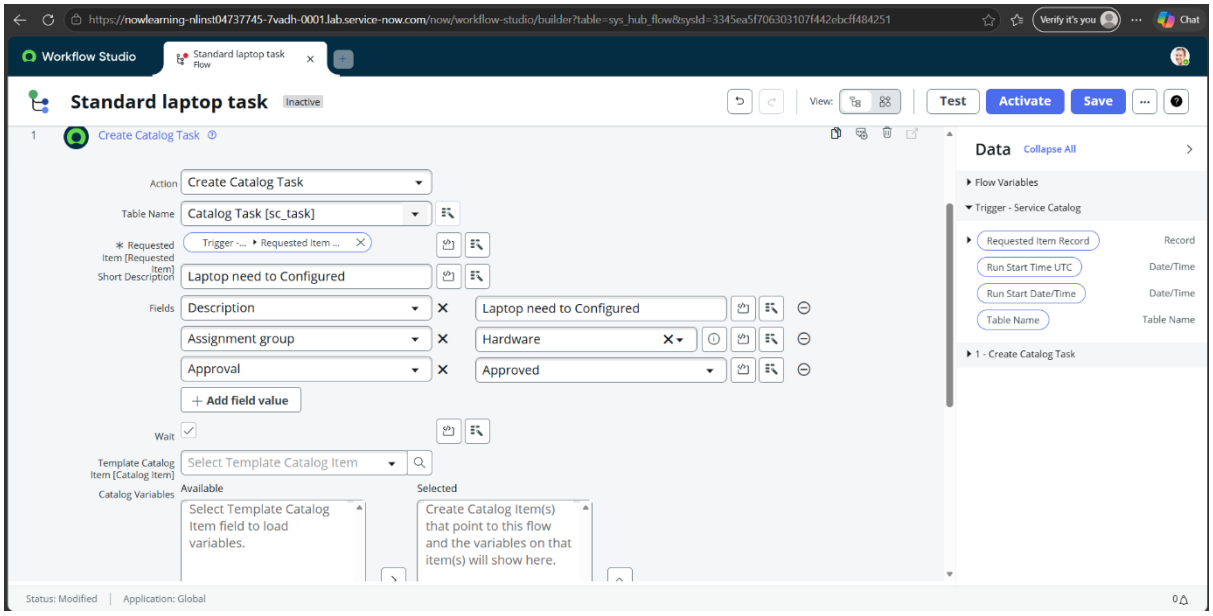

Step 16: Mention the short description as “ Laptop need to Configured ”.

Step 17: Click on add field value. Select description field and value as “ Laptop need to Configured ”.

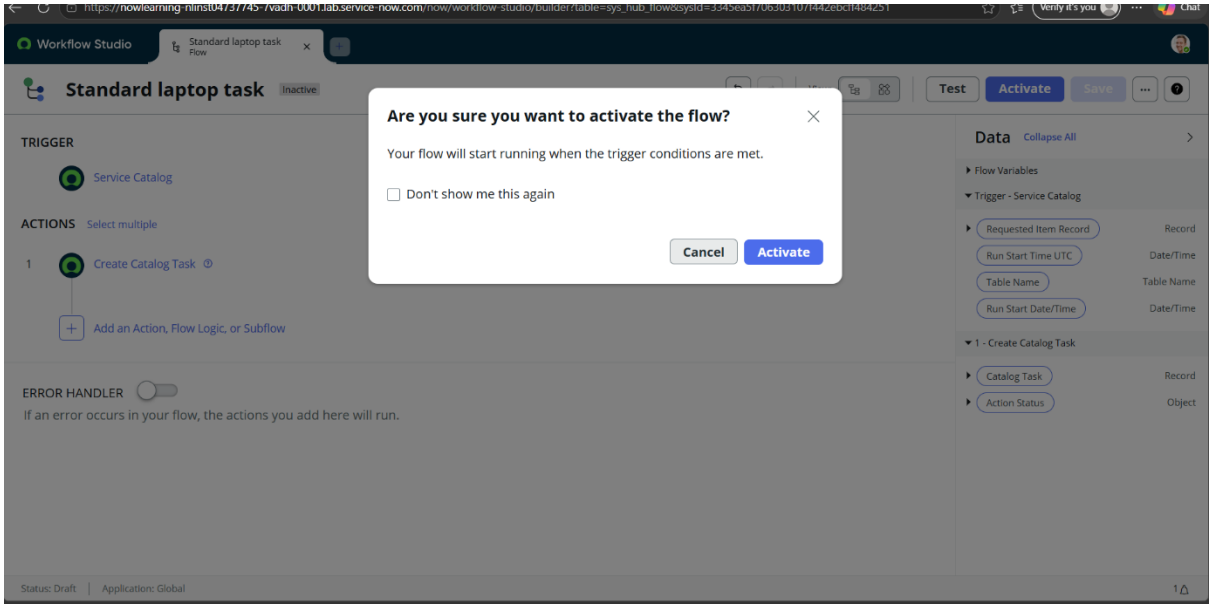

Step18: Select Assignment group field and value as “ Hardware ”.

Step19: Select Approval field and value as “ Approved ”.

Step 20 : Leave the remaining as default and click on Done.

Step 21: Click on save the Flow. And Click on Activate again click on Activate.

Expected Outcome:

After the request meets the configured approval condition, a Catalog Task is automatically created and assigned to the appropriate team, eliminating the need for manual task creation and routing.
